Experience

Software Developer @ AdPro | 2015 - Present

Currently working in Boosmart on **AdPro** from the very beginning of the project, the first employee other than the co-founders. AdPro is a SaaS platform that **optimizes Google AdWords campaigns** in various levels. I am working as a **full-stack developer** using the **LEMP** stack in the project, and also maintaining the servers that are used for various services AdPro offers.

Software Developer Intern @ tazi.io | 2016 June - August

Worked as intern in **tazi.io**, which is a machine learning startup in ITU Teknokent. I worked on **self-organizing networks**, implemented a special network in **Scala** language and tested it with different datasets for better visualization options.

Skills

Using **C** and **C++** for school projects for **3 years**. Have been using **PHP** within the **LEMP** stack for **more than 1.5 years in production environments**, same as well for **SQL** and **JavaScript**. Also used **Python**, **Scala** and **Java** for various projects, however I consider myself as a beginner in those languages.

Projects

easy-adwords

EasyAdWords is a simple wrapper library for Google AdWords PHP Client library that allows some basic operations to be performed easily. It is written in pure PHP and available on Composer - PHP package manager. [Source](#) - [Composer](#)
